FRONTEND MASTERY BOOTCAMP

Launch your career in web development

Our Mission

We believe that **college education isn't enough** to make you industry-ready. Our mission is to bridge that gap with a structured, project-based bootcamp that teaches you **real-world frontend development skills**, and prepares you for **internships, jobs, and freelance work.** At Frontend Mastery Bootcamp, we're on a mission to **bridge the gap** between college education and the real-world demands of the tech industry. We do this through immersive, **project-based learning** that equips you with the skills and experience employers are looking for.

What You'll Learn

Our intensive 3-month curriculum is designed to take you from beginner to job-ready frontend developer:

- **Month 1: HTML, CSS, and JavaScript Fundamentals**
  - Master the core languages of the web. Build responsive layouts, interactive elements, and dynamic styling.
- **Month 2: React.js**
  - Dive into React, the most popular JavaScript library for building user interfaces. Learn about components, state management, and hooks.
- **Month 3: Advanced React and Project Development**
  - Explore advanced React concepts, build complex UIs, and focus on building your portfolio projects.

Plus:

- Hands-on Projects throughout the bootcamp
- Machine Coding round problem solving
- Comprehensive Job Preparation (resume building, interview practice)

Bootcamp Highlights

- **Live, Interactive Classes:** Learn from experienced instructors in real-time.
- **Project-Based Curriculum:** Build a portfolio of projects that showcase your skills.
- **1-on-1 Mentorship:** Get personalized support and guidance from industry professionals.
- **Vibrant Community:** Connect with fellow students and build your network.
- **Resume & Interview Prep:** Ace your job applications and interviews with confidence.
- **Career Support:** We provide resources to help you find your dream job.

Projects You'll Build

Get ready to build a stunning portfolio! Here are some of the projects you'll create during the bootcamp:

- **Personal Portfolio Website:** Showcase your skills and experience with a professional online presence.
- **E-commerce Storefront:** Build a fully functional online store with product listings, shopping cart, and checkout.
- **Interactive To-Do App:** Create a dynamic to-do list application with features like adding, deleting, and completing tasks.
- **React Blog:** Develop a blog application with posts, comments, and user authentication.
- **Dashboard UI:** The most used skill in the industry is dashboard creation and you will hone this skill.
- **And more!**

Who This Is For

Frontend Mastery Bootcamp is designed for:

- College students looking to **gain practical skills** and **launch their careers** in web development.
- Individuals with **little to no prior coding experience** who are eager to learn.
- Anyone who wants to **build stunning websites and user interfaces**.

Prerequisites:

- Basic computer literacy
- A passion for learning and problem-solving
- Access to a computer and internet connection

Meet Your Mentor

Priyanshu Jha
Software Developer - TCS | working on-site with DMart Labs | ex-PhysicsWallah, ex-Growhut

- Built frontend systems for real-world apps
- Taught 100+ students to code confidently
- Passionate about student careers and real education

What Students Are Saying

- "The Bootcamp gave me the skills and confidence to land my first job as a frontend developer!"
  - Aditi (3rd Yr B.Tech)
- "Loved the way every project was explained and reviewed. The project-based approach made learning fun and engaging."
  - Raj (2nd Yr CS)
- "I highly recommend Frontend Mastery Bootcamp to anyone looking to break into the tech industry."
  - Sneha (Final Yr, MCA)

Pricing & Batch Details

📅 **Next Batch Starts: 12 July 2025**   ⏳

Duration: 6 Months (3 Months regular class + 3 Months Interview Prep)

💰 **Pricing: Rs. 9999/-**

🔥 **Early Bird Offer: Rs. 7999/-**

📦 **Includes: All classes, projects, certificate, career support**

🎁 **Refer a friend: ₹500 discount for both**

Web Development Curriculum Overview

Welcome to this comprehensive three-month curriculum designed to take you from web development fundamentals to building complex applications using modern technologies. Each month focuses on a critical aspect of web development, ensuring a progressive learning experience.

📦 Month 1: HTML, CSS, and Web Foundations

Week 1: Web Basics + HTML

- **Day 1: Intro to Web & Tools**
  - VSCode Setup
  - Understanding how the Internet works
- **Day 2: HTML Structure**
  - Tags and Semantic HTML
- **Day 3: Forms and Media**
  - Media tags and accessibility considerations

Week 2: CSS Essentials

- **Day 4: CSS Basics**
  - Syntax, colors, typography, and selectors
- **Day 5: Box Model and Layout**
  - Positioning and display properties
- **Day 6: Flexbox**
  - Deep dive into Flexbox for layout design

Week 3: Responsive Design

- **Day 7: Media Queries**
  - Mobile-first design approach
- **Day 8: CSS Grid**
  - Introduction to CSS Grid for complex layouts
- **Day 9: CSS Units and Naming**
  - Understanding CSS units and BEM naming conventions

Week 4: Project

- **Day 10: Build a Responsive Portfolio Homepage**
- **Day 11: Final Touches**
  - Introduction to Git & GitHub for version control
- **Day 12: Peer Review & Presentation**

⚙️ Month 2: JavaScript Essentials

Week 5: JS Basics

- **Day 13: JavaScript Syntax**
  - Variables and operators
- **Day 14: Functions and Control Structures**
  - Loops and conditions
- **Day 15: Data Structures**
  - Arrays and objects

Week 6: DOM Manipulation

- **Day 16: Advanced JS Concepts**
  - Scope, hoisting, and arrow functions
- **Day 17: DOM Interaction**
  - DOM selectors and events
- **Day 18: To-Do App Project**

Week 7: Intermediate JS

- **Day 19: ES6 Features**
  - Destructuring, spread, and rest operators
- **Day 20: Array Methods**
  - map, filter, and reduce
- **Day 21: Asynchronous JavaScript**
  - Promises, async/await, and Fetch API

Week 8: Project

- **Day 22: API-Based Application**
  - Build a Weather or Movie App with API integration
- **Day 23: Finalize & Polish Project**
- **Day 24: Project Showcase**

⚛️ Month 3: React + Deployment

Week 9: React Basics

- **Day 25: Introduction to React**
  - JSX and components
- **Day 26: State Management**
  - Props, state, and events
- **Day 27: Forms in React**
  - Controlled components

Week 10: Routing & State Management

- **Day 28: React Hooks**
  - useEffect and other hooks
- **Day 29: React Router**
  - Implementing routing in React apps
- **Day 30: State Management**
  - Props drilling, lifting state, and Context API

Week 11: React Project

- **Day 31: Project Planning**
  - Choose between a Notes App or a Blog
- **Day 32: Development**
- **Day 33: Finish & Deploy**
  - Deploy using Vercel or Netlify

Week 12: Job Prep

- **Day 34: Resume Building**
  - Tips for LinkedIn and GitHub profiles
- **Day 35: Interview Preparation**
  - Frontend interview questions
- **Day 36: Demo Day or Mock Interviews**

This curriculum is designed to provide a solid foundation in web development, equipping you with the skills necessary to create functional, responsive, and interactive web applications. Happy coding!
